

DINA TEL 3

ON-FARM

Dina TEL 3 is a wireless remote control with a large display that shows information regarding all feed operations. Dina TEL 3 is equipped with an intuitive keyboard to manage the weight indicator directly from the tractor/loader cab

GALLERY

FEATURES

- Execution of recipes and distribution programs
- Lock and save weight
- Wizard for immediate device diagnostics
- Communication (COM) address setting with a dedicated key
- Lower radiation emission thanks to the external antenna
- Large LCD display for a perfect read of weight and messages
- View recipe and component to load
- View distribution points
- Multi-indicator control for multi mixer management
- Dina TEL 3 works simultaneously with other wireless devices within the same WiNET network
- If the operator goes out of range network, the Dina TEL3 system retrieves information automatically when back to the network range
- The Dina TEL 3 menu can be set in different languages (English, Italian, Spanish, German, French, Portuguese, Danish, Dutch, Polish and Russian), which may be different from that used on the indicator.

BENEFITS

- Intuitive interface, simple to learn
- Increase loading accuracy
- Improve operations' efficiency
- Easy to install
- Seamless integration with all Dinamica Generale programmable weight indicator for feeding monitoring.
